“Happy Thoughts”

T-Shirts!

By Jane Trejo-Beverly

Jane’s inspiration for designing these uplifting T-shirts came by way of Dr. Masaru Emoto who has written several books and has several DVD’s on the **“Message from Water”** his research claims that since our bodies consist of 90% water, that he has proven that **“the power of thoughts”** creates very positive and healing effects on our bodies by the way we choose to **think and act** on a daily basis. In his one DVD **“Water Crystals in Motion”** he explains this very clearly and says that **“water listens to music and reads printed words”** therefore, effecting the state of the body and mind in a very positive way.

That is why I created these loving and very Happy T-Shirts!!! So, that we can kindly remind ourselves on a regular basis how precious our mind, body and lives are to us and also to those who love us so dearly!

I hope you’ll enjoy these loving creation of mine as much as I do!
